CIEH Certificate in Risk Assessment Principles and Practice

Duration – 1 Day

Prerequisite

Basic and adequate knowledge and understanding of the procedures for carrying out risk assessments. Good written and verbal communication. Good ability to analyse workplaces and activities. Confidence to seek additional advice and information.

Certification

CIEH certificate awarded upon successful assignment and self-evaluation.

Course Overview

Designed for anyone with a responsibility to conduct risk assessments such as: Team leaders, supervisors or managers, quality controllers, technicians, engineers, health and safety specialists and personnel contributing to the risk assessment process.

Upon completion candidates will be able to contribute to risk assessment programmes, conduct risk assessments, organise and implement a risk assessment programme where not already started, participate in the identification of specific needs and assist employers in meeting legal requirements.

Course Content

Course subjects include:

- Legislation
- Principles of Risk Assessment
- Prioritising risk
- Controls and monitoring controls
- Documentation
- Risk Assessment in practice

What the course offers

- Nationally recognised and respected certificate delivered by a QTS trainer with experience in a variety of sectors
- No jargon approach with clear scenarios that delegates can relate to
- A range of training tools including CIEH – 'Risk Assessment Principles and Practice' course book and Risk Assessment training pack

Other courses available on request

Courses can be delivered at your premises or at a local training venue – call for details
